

AMG is a company located in the İzmir Kemalpaşa Organized Industrial Zone in Turkey. Our company is a contract manufacturer for Natura Feed Ingredients Inc. and follows the Sustainable Quality Assurance Program SQAP. This program is fully integrated with the Food Safety for Specialty Feed Ingredients Management System "FAMI-QS".

As a company, we utmost value highly motivated and hardworking students who want to do an internship at our company and each year a number of university students intern for a short period of time at our laboratories under our supervision. This year, for the first time, we accepted a junior high school student who had an impressive background and genuine interest in chemistry. This student was Alessio Eren Aliprandi and we were very happy to supervise him. Eren investigated the best ways to determine Betaine and the most efficient and practical HPLC devices and detectors to determine it. He was not only successful in doing deep research but also good at presenting it. At the end of two weeks of the internship period, he completed his search and prepared a well-focused presentation addressing all important issues.

We were very happy to witness Eren's good performance in his research and are ready to offer him future possibilities at our company during his university study, too. We wish him the best in his future academic endeavors and never hesitate to recommend him to any academic institution of his choice and program in chemistry or closely related to chemistry.

Muhammet BÜYÜKBAYRAM Ph.D.c. Org. Chem.
R&D Director
